### Plumbing License Requirements (RSA 153:27)

In accordance with New Hampshire Statute, it is **unlawful** for anyone to install plumbing without a license unless they are exempt from the licensing requirements. No one is exempt from the Plumbing Code requirements. All installations, regardless of who performs the work, must comply with New Hampshire and Nashua Plumbing Codes.

### Exemptions for Homeowners (RSA 153:36)

The Plumbing Licensing requirements do not apply to an "owner or his/her agent who installs, repairs or replaces plumbing in his/her own residence." This only applies if the homeowner or his/her agent is actually installing the work. Homeowners who apply and are issued plumbing permits and then decide to contract with a licensed plumber for all or a portion of the work shall have the licensed plumber apply and obtain a plumbing permit for the work being done by the licensed plumber. **The homeowner shall not obtain a plumbing permit and then have someone else (licensed or not) do the work under the permit obtained by the owner.**

### Exemptions for Property Owners (RSA 153:36)

The plumbing licensing requirements do not apply to an "owner or his agent who makes minor installations, repairs or replacements to property owned by him/her."

### Definitions

For the purposes of administering the above exemptions, the following definitions shall apply:

**Agent** means someone who is designated as such in writing by the owner and installs plumbing without being compensated for the installation

**Residence** means a detached, single-family dwelling unit

**Repair** means to restore to sound condition after damage or deterioration

**Minor Installation** means replacement of fixtures without any relocation or re-routing of piping or traps associated with such

**Homeowner** means the legal owner of record according to Building Safety Department or Assessing Department records who currently resides in the subject dwelling unit

### Code Provisions (2009 IRC)

**Application for permit** – To obtain a permit the applicant shall first file an application therefore in writing on a form furnished by the department of building safety for that purpose. Such application shall: 1) Identify and describe the work to be covered by the permit for which application is made. 2) Describe the land on which the proposed work is to be done by legal description, street address or similar description that will readily identify and definitely locate the proposed building or work. 3) Indicate the use and occupancy for which the proposed work is intended. 4) Be accompanied by construction documents and other information as required in Section R106.1. 5) State the valuation of the proposed work. 6) Be signed by the applicant or the applicant's authorized agent. 7) Give such other data and information as required by the building official. (R105.3)

**Suspension or revocation** – The building official is authorized to suspend or revoke a permit issued under the provisions of this code wherever the permit is issued in error or on the basis of incorrect, inaccurate or incomplete information, or in violation of any ordinance or regulation or any of the provisions of this code. (R105.6)

**Work commencing before permit issuance** – Any person who commences work requiring a permit on a building, structure, electrical, gas mechanical or plumbing system before obtaining the necessary permits shall be subject to a fee (not to exceed \$250) established by the applicable governing authority that shall be in addition to the required permit fees. (R108.6)

**I have read and understand the above. I understand that making a false statement on this form is an offense against New Hampshire law.**
